Professional Summary

Strategic thinker passionate about data analytics and process improvement, with a B.Tech in Electronics & Communication Engineering and hands-on experience in data analysis, visualization, and operational reporting. Skilled in Excel, SQL, and Google Data Studio with growing expertise in Tableau and Alteryx. Adept at collaborating with cross-functional teams, analyzing large datasets, and delivering actionable insights that improve decision-making and efficiency. Eager to apply analytical skills in the financial domain to support risk management and business strategy.

Key Skills

- Data Analytics & Reporting: Excel (Advanced), Pivot Tables, VLOOKUP, Data Handling
- Visualization Tools: Google Data Studio, Tableau (Basic to Intermediate), Canva
- Workflow & Automation: SQL (Queries, Joins, Data Extraction), Alteryx (Basic ETL Concepts)
- Business Analytics: Operational Risk Data, KPI Tracking, Cost & Profitability Analysis
- Other Tools: Microsoft Office Suite, Project Management, Customer Service Metrics Analysis
- Soft Skills: Analytical Thinking, Problem-Solving, Cross-Team Collaboration, Process Optimization

Work Experience

Operational Executive

Anotech India Solutions Pvt. Ltd. | 05/2024 – 08/2025

- Supported executives with data collection, cleansing, and reporting, ensuring accuracy of financial and operational metrics.
- Built dashboards and reports in Excel and Google Data Studio to track KPIs and compliance performance.
- Conducted trend and variance analysis to identify cost-saving opportunities and process inefficiencies.
- Automated recurring reporting tasks using pivot tables, formulas, and structured data handling methods.
- Collaborated with leadership to translate business requirements into measurable metrics for decision-making.

Projects

- Sales & Revenue Performance Dashboard (Google Data Studio): Built an interactive dashboard to visualize revenue trends, regional sales distribution, and product performance.
- Inventory Optimization (Excel + SQL Concepts): Cleaned raw stock data, performed reorder-level analysis, and simulated cost reduction through optimized stock cycles.
- Customer Service Analytics (Excel + Google Sheets): Processed and analyzed customer support data, identifying key pain points and improving response efficiency through data-driven insights.
